

18 hole solar bracket

Can I use a Z bracket on a rigid solar panel?

Please Note: We recommend this Z bracket for rigid solar panels. Single solar panel ≤ 100 watt: 1 set; 150-200 watt: 2 sets. This product is not recommended for single solar panel over 200 watt. If you have any questions regarding this product, please call us at 1 (909) 287-7111 or contact us for troubleshooting assistance.

How many watts can a solar panel mount?

WindyNation's solar panel Z-Bracket mounting kit makes it easy to mount solar panels. From recreational vehicles (RV's) to boats to cabins or anywhere else where you need a simple yet reliable method to mount solar panels. This kit is suitable for mounting solar panels up to 150-Watt. What is the thickness of the metal?

Do nut & bolts line up in solar panel?

The nuts and bolts don't line up in solar panel. The nut has a winged flange for additional security. Depending on the location of the mounting hole relative to the panel frame, that may need to be shaved. Helpful?

How thick are the brackets?

The brackets are 0.085" thick. How do these bolt to the panel? Do they bolt to the underside of the panel? I am thinking I would do better with a clip style over the edge of a panel and only bolts to the roof. Yes, they bolt to the underside of the panels frame and then to the surface where the panel will be mounted. Is steel or aluminium

How many solar panels can be installed on a single pole?

Pole Mounts are used for a single solar panel or multiple solar panels and can be configured for side-of-pole or top-of-pole installation of up to 12 solar panels in an array on a single pole.

Will brackets fit a slim panel?

These brackets can be made to fit the slim panel if you drill out the panel mounting holes to 5/16"; thus potentially violating the panel warranty. There will be very little clearance between the bottom of the bolt and the back of the panel.
