

## 20 Wind turbine generator

What is a 20kW wind turbine?

It is more reliable and efficient than the induction generator with gearbox or booster. The 20kW wind turbine has a huge rotor rated 15.6m, and output 20kW at 8m/s, it generates more power in low wind speed area. There are triple safety protections for Aeolos-H 20kW wind turbine, these keep the wind turbine safe in high wind speed area too.

What options are available for a 20kW wind turbine?

Multiple options available \* PVMars provides a world-class 20kW wind turbine with a controller, IGBT inverter, and batteries. Full set 20kW wind plant for villa, hospital, and farm.

Can a 20kW wind turbine be powered by a battery?

No, because the battery is DC power and the 20kW wind turbine is three-phase AC power. The connection between them requires a wind controller to function as a DC-to-AC converter. This way, the battery can fully receive the 20kW wind turbine power. PVMARS provides gel batteries and lithium batteries.

What is Aeolos H 20kW wind turbine?

Aeolos-H 20kW wind turbine is an updated design with three phase direct-drive generator, no gearbox or booster device. It is more reliable and efficient than the induction generator with gearbox or booster. The 20kW wind turbine has a huge rotor rated 15.6m, and output 20kW at 8m/s, it generates more power in low wind speed area.

How loud is a 20kW wind turbine?

The 20kW wind turbine noise level is about 45 decibels, so it does not affect your daily life or sleep. Maybe the language is too pale. You can watch the video below and listen to the actual sound: [Play Video about How Noisy Are Wind Energy Generation? Can I use my one wind turbine directly?](#)

What is the EN-20kW-H wind turbine?

The EN-20KW-H wind turbine is extremely easy to integrate with solar panels to create off-grid power systems that require modest amounts of energy. Available in 360V for battery charging applications. The EN-20KW-H is low start up wind speed, low compact, beautiful, easy installation and low vibration.

Generator. Permanent magnet generator of 40 poles, 20 kW maximum power at 120 rpm and 1,700 Nm provides a high level of energy performance. Anemometer Wind speed sensor accurately tracks the behaviour of the wind in real time, in ...
