

Who is the world's leading solar module supplier in 2025?

Between 2013 and 2021, Trina Solar, JinkoSolar and LONGi Solar dominated the annual tables for leading module supplier by shipped volumes. While LONGi Solar is likely to retain this position for the next 2-3 years, 2025 could see Tongwei Solar emerging as the new global module powerhouse.

Who will dominate the global PV module market in 2023?

A total of 18 Chinese companies were selected in the top 20 list, with a total output of more than 440GW in 2023, gradually taking over the global PV module market with their unique advantages. LONGi, the king of the PV industry, will supply 66.44GW of modules in 2023, up 42% year on year.

Will Tongwei solar become a global module powerhouse in 2025?

While LONGi Solar is likely to retain this position for the next 2-3 years, 2025 could see Tongwei Solar emerging as the new global module powerhouse. After a couple of failed attempts (Yingli and Suntech ran into cashflow and debt problems shortly after becoming market leaders), from 2013 it has been a more predictable landscape.

Does sinovoltaics have a z score?

Did you know? Sinovoltaics has been publishing its PV Module Manufacturer Ranking Reports based on the Altman Z score formula since early 2016 and is the first and only independent source for PV Module, Inverter, and Energy Storage Manufacturer Ranking Reports based on their financial strength.

Which inverter companies are leading the market growth in 2023?

Preferential policies promoted the inverter market growth in 2023. Most of the major inverter companies won a large amount of orders and expanded their capacity with high shipment volume. Sungrow and Huawei tied for first place in the list with outstanding performance.

Should PV modules be sold to end-markets globally?

While often PV manufacturers claim to be happy in their current value-chain 'space' (leading polysilicon supplier, pure-play merchant cell maker, etc.), history tells us that the lure of global domination from a module supply standpoint is simply irresistible. Selling PV modules to end-markets globally is solar's endgame.
