

3MWh energy storage system won the bid

Does RWE have a green energy strategy?

RWE continues to deliver on its Growing Green Strategy. In the U.S., the company is further expanding its green energy portfolio with the recent completion of three new battery energy storage systems (BESS) totaling 190 MW (361 MWh) in the States of Texas and Arizona.

What is the cumulative installed capacity of energy storage projects?

The cumulative installed capacity of new energy storage projects is 21.1GW/44.6GWh, and the power and energy scale have increased by more than 225% year-on-year. Figure 1: Cumulative installed capacity (MW%) of electric energy storage projects commissioned in China (as of the end of June 2023)

Are battery energy storage systems a good partner for renewables?

Battery energy storage systems supply flexible and affordable electricity when it is needed most, making them an ideal partner for renewables. The three new BESS are paired with solar, allowing them to store excess electricity and send it back to the grid at a later time.

How a domestic energy storage system compared to last year?

In the first half of the year, the capacity of domestic energy storage system which completed procurement process was nearly 34GWh, and the average bid price decreased by 14% compared with last year. In the first half of 2023, a total of 466 procurement information released by 276 enterprises were followed.

Where can I find information about energy storage research products?

You can visit the website of CNESA, to learn more about research products on energy storage industry. Please contact CNESA if you have any questions:

How big is China's energy storage capacity?

According to incomplete statistics from CNESA DataLink Global Energy Storage Database, by the end of June 2023, the cumulative installed capacity of electrical energy storage projects commissioned in China was 70.2GW, with a year-on-year increase of 44%.

3MWh energy storage system won the bid
