

Do ASEAN countries have a potential for solar PV?

Finally, the paper presents conclusions and a set of recommendations. Out of the 10 ASEAN countries, 5 have implemented FiT as a key policy incentive to stimulate the progress of RE. It is found that the ASEAN countries have great potential for solar PV in terms of their annual solar insolation levels, which range from 1460 to 1892 kWh/m<sup>2</sup> per year.

Where is solar power available in ASEAN?

The current key markets for solar power are Vietnam, Malaysia, Thailand, the Philippines, and Indonesia, which also account for more than 87% of ASEAN's population. The solar M&A scene is most active in Thailand and Vietnam - the countries with the highest installed capacities in the ASEAN region.

Why do governments need to regulate rooftop solar systems in ASEAN?

Regardless of the system, optimizing the use of solar rooftops is a great way to generate clean energy thus achieve renewable energy goals. For those reasons, governments across the region (ASEAN) need to maintain appropriate policy and regulation to boost the installation of rooftop solar systems.

## 2.3. Floating PV module

What is the installed capacity of floating PV module in ASEAN?

In the ASEAN region, total installed capacity of floating PV was below 1 MW until 2019, but large-scale floating PV module installations grew rapidly in Indonesia, Singapore, Thailand, Malaysia, and the Philippines from year 2020 and onwards.

Does Vietnam have a solar PV system?

Development and government support toward PV system installation in ASEAN [14]. Vietnam began solar PV installation in 2018 with a capacity of approximately 100 MW. Over the next two years, Vietnam experienced rapid growth in solar PV installation, with the total solar PV energy output reaching around 16.5 GW in 2021.

Will solar and wind help ASEAN develop a charging infrastructure?

Solar and wind may lead to new opportunities to further equip ASEAN for the development of such charging infrastructure. In addition to being a cleaner option, solar and wind are getting cheaper worldwide.
