

Analysis of photovoltaic panel price trend in June

Are photovoltaic panel prices going down?

On average, prices in all module categories have been corrected downwards by around 10%. Never before in the history of photovoltaics have panel prices plummeted so significantly in such a short space of time.

Will the cost of capital increase in solar PV & wind markets?

In real terms (i.e. excluding the impact of inflation), the weighted average cost of capital (WACC) is expected to increase in most large solar PV and wind markets, excluding China. The higher cost of capital could offset most of the cost decreases resulting from lower commodity prices and further technology innovation in the next two years.

What happened to Photovoltaic prices in October 2024?

Overview by technology of different price points in October 2024, including the changes over the previous month: Only tax-free prices for photovoltaic modules are shown. The prices stated reflect the average offer prices in retail and on the European spot market (customs cleared).

Why is monitoring the price development of solar modules important?

Monitoring the price development of solar modules is of crucial importance for investors, manufacturers and other players in the solar energy industry. A sound understanding of market trends makes it possible to make the most of opportunities and take forward-looking decisions.

Will solar PV & wind be more expensive in 2024?

Consequently, the average LCOE for utility-scale PV and wind could be 10-15% higher in 2024 than it was in 2020. Although their costs continue to exceed pre Covid-19 levels, solar PV and onshore wind remain the cheapest option for new electricity generation in most countries.

How does pvxchange differentiate between the main technologies available on the market?

In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable industry tool. Today, it is hard to imagine the industry without our price index, trend data, and in-depth analysis and commentary.

Electricity generation costs from new utility-scale onshore wind and solar PV plants are expected to decline by 2024, but not rapidly enough to fall below pre Covid-19 values in most markets outside China. Although commodity and ...
