

# Analysis of the current status of domestic photovoltaic inverters

What is the residential solar PV inverter market trend?

The residential solar PV inverter market trend away from traditional inverters toward string inverters may be seen in the increased number of project planners and developers considering string inverters with a central architectural design.

Why is the PV inverter market growing?

Increased global PV demand: The increased global demand for photovoltaic (PV) systems presents a massive opportunity for the PV inverter market to grow substantially in the coming years.

Who owns the global residential solar PV inverter market?

The global residential solar PV inverter market is fragmented. ABB Ltd, Schneider Electric SE, Siemens AG, Mitsubishi Electric Corporation, and Omron Corporation are the market's leading companies.

Which country installed the most solar PV inverter in 2018?

With 44.4 GW of annual installations and 48.7% of the global market, China was the most prominent country in the global solar PV inverter market in 2018. After China, the United States registered annual installation of 10.9 GW, representing 12% of global solar PV inverters installed in 2018.

How big is the PV inverter market?

The PV inverter market size is valued at US\$15.28 billion by 2024, from US\$41.87 billion in 2021, at a CAGR of 15.5% during the forecast period.

What are residential solar PV inverters?

Residential solar PV inverters account for two-thirds of the industry's distributed photovoltaic capacity, owing to widespread acceptance of renewable energy sources in the housing sector and the growth of net metering schemes.
