

Anti-islanding is a protective mechanism used in distributed generation systems, such as solar power systems, to prevent them from continuing to supply power when the main electrical grid is down. It works by detecting grid disconnection ...

Anti-islanding protection is a commonly required safety feature which disables PV inverters when the grid enters an islanded condition. Anti-islanding protection is required for UL1741 / IEEE 1547. Knowledge of how this protection method ...
