

Up to 2027, the IEA forecasts Australia's renewable energy capacity to expand by 85% to reach 40 gigawatts (GW), thanks to the introduction of ambitious targets and increased clean energy funding at federal and state levels, PPAs, and ...

Overview Incentives Installations by type Potential Supply chain Renewable energy targets Projects See also The Solar Homes and Communities Plan was a rebate provided by the Australian Government of up to A\$8,000 for installing solar panels on homes and community use buildings (other than schools). This rebate was phased out on 8 June 2009, to be replaced by the Solar Credits Program, where an installation of a solar system would receive five times as many Renewable Energy Certificates for the first 1.5 kilowatts of capacity under the Renewable Energy Target (se...
