

## Balcony photovoltaic panel finite element establishment

Can a finite element model predict the thermal performance of a solar module?

A detailed theoretical model based on the finite element method predict the behaviour of the PV module. Temperature distribution of the solar cell layer and the highest module temperature was investigated to analyse thermal performance of the module. No potential conflict of interest was reported by the author (s).

How efficient is a building integrated photovoltaic system?

In [78,79],the authors develop an experimental study of a Building-Integrated Photovoltaic system combined with a water storage tank prototype. The authors achieve a thermal efficiency of nearly 8% during the winter and 40% during the summer.

Can façade integrated photovoltaics (FIPV) be used in high-density urban contexts?

Besides utilizing limited roof areas, façades also have promising potential for harvesting solar energy and should be exploited for Façade Integrated Photovoltaics (FIPV) application, especially in high-density urban contexts [2, 3].

Can pv/T Systems be used to design innovative energy façade elements?

In Lee et al. [ 62 ], an extensive review is presented on PV/T systems, being of particular interest to works concerning the design of innovative energy façade elements due to the novelty of the strategies presented.

What is faç ade integrated photovoltaics (FIPV)?

High performance of energy production and GHG emission reduction is achieved. Façade Integrated Photovoltaics (FIPV) is a promising strategy to deploy solar energy in the built environmentand to achieve the carbon-neutral goals of society. As standing out areas of façade,cantilevered balconies are ideal for FIPV application.

Are cantilevered balconies suitable for FIPV?

For high-rise residential buildings, cantilevered balconies are popular faç ade elements connecting the interior and the outdoor space accessible for dwellers, and the standing-out balcony railing areas are ideal for FIPV[,,,].

A bal­cony PV sys­tem is a small PV sys­tem that is mount­ed on a bal­cony, a ter­race or on the façade of a build­ing and is sim­ply plugged into a sock­et. This is a form of decen­tralised ener­gy ...
