

Billboards replace photovoltaic panels

Are solar Billboard Lights the same as Envirolight?

Because most solar billboard lighting kits are made with LED light fixtures, they do not deliver the same quality or quantity of light as the EnviroLight, which uses high-output HID fixtures. Kits include solar panels, lights, backup battery, and lighting controller.

Where are solar Billboard Lights made?

Our solar billboard and sign lighting systems are proudly built right here in the USA by Silicon Solar's team of solar professionals. At Solar Billboard Lights we offer you and your clients the very best in solar billboard lighting kits and solar street lighting solutions for commercial, residential, and municipal lighting applications.

What are the best solar Billboard Lights?

Solar billboard lights, the EnviroLight, from SolarBillboardLights.com are the world's best, most cost-effective billboard lighting system.

Why should a Billboard be illuminated by a solar system?

A solar system can save thousands due to eliminating the need for trenching cables, and will also provide an environmentally friendly image for the advertiser and also the billboard company. Solar Illuminations offers many lighting solutions that can illuminate billboards of most sizes and designs.

What is included in a Billboard lighting kit?

Kits include solar panels, lights, backup battery, and lighting controller. The increased output of the EnviroLight allows us to offer smaller packages that still deliver performance that is far superior to other billboard lighting kits, and allows us to offer them to you at a price that is affordable and cost-effective.

Can a sticker wrap photovoltaic panels?

Italian startup Sunspeker has developed a customizable, fully recyclable sticker to wrap photovoltaic panels. The company recently secured EUR115,000 (\$120,950) in funding from Italian state-run investment bank Cassa Depositi e Prestiti (CDP) to bring its new technology to market.
