

Bopp film for solar power generation in stock

What is Bopp packaging film?

PennPac offers a wide range of Biaxially Oriented Polypropylene(BOPP) films for food packaging,printing and laminating,pressure-sensitive labels,and industrial applications. BOPP film is stretched in both machine and transverse directions which results in increased toughness and stiffness. What is BOPP packaging film and how is it made?

What are BOPP films used for?

Flexible packaging applications,such as food packaging,labeling,and industrial packaging,make extensive use of these films. The growing demand for eco-friendly packaging options and rising disposable incomes are projected to fuel considerable expansion in the worldwide BOPP films market in the next years.

How is Bopp made?

Extrusion: The manufacturing process of BOPP begins with the extrusion of molten polypropylene resin. In this step,polypropylene pellets are melted and formed into a flat sheet or film using an extrusion process. The thickness of this initial film can be controlled based on the desired application.

What is Bopp based on?

PolypropyleneBase: BOPP is derived from polypropylene,a versatile polymer known for its excellent chemical resistance,high melting point,and low density. Polypropylene is a type of plastic that can be melted down and reshaped multiple times without significant degradation in its properties.

Where are BOPP films made?

For more than 25 years,we have manufactured BOPP films of the highest quality at our flagship Lolita,Texas facilities. Our Morristown plant,built in 1997,houses two wide web extrusion lines and a new state-of-the-art metallizer. Acquired in 2015,our Gray Court,South Carolina,plant has allowed us to expand our capacity for our customers.

What makes Trico BOPP films unique?

Trico BOPP films are manufactured using strict quality control measures that ensure high-value,superior products that meet or exceed your requirements and specifications. BOPP films can be made from a single raw material,ensuring their recyclability.

JPFL Films Private Limited is a part of the USD 2.5 billion B.C. Jindal group, which has been offering a wide range of products and solutions for more than 6 decades. From being only a polyester yarn producer in 1985, JPFL diversified ...
