

What is a solar racking mounting bracket?

Mounting brackets are heavy-duty equipment, usually made from stainless steel or aluminum. All solar racking and mounting products, whether for the rooftop or ground, must meet strict guidelines to ensure durability and structural integrity to withstand high winds and weather events.

What are the best solar mounting and racking brands?

The top two high-quality solar mounting and racking brands are: Originally, IronRidge supported mostly small, off-grid projects. But today, IronRidge is known for its uniquely shaped and durable XR rail series for pitched roofs. They have equally great options for flat roofs and ground mounts, as well.

Which clamps are compatible with PV module thickness?

The Mid Clamps and End Clamps are compatible with PV module thickness between 30-55mm. The ClickFit system is fabricated from robust materials, such as aluminum and coated steel, to ensure corrosion-resistance and overall product longevity. ClickFit has been tested in extreme weather conditions including wind, fire, and snow.
