

# Buy new photovoltaic panels and old ones

Can I buy second-hand solar panels?

There are two options for buying second-hand solar panels: used or refurbished products. As you now know, used solar panels were previously owned by a consumer or business. Refurbished solar panels are used solar panels that have been restored to an acceptable condition or standard by a refurbishing company or the manufacturer.

Are used solar panels better than new solar panels?

Used solar panels have shorter life spans than new ones. With net metering, you can sell any extra energy you make back to the utility company. Used solar panels don't have a warranty. With used solar panels, you can install them as a do-it-yourself project. Used solar panels generate less power than a refurbished or new system.

What are refurbished solar panels?

Refurbished solar panels are used solar panels that have been restored to an acceptable condition or standard by a refurbishing company or the manufacturer. Below, we've highlighted the main differences between used and refurbished solar panels to better aid you in making the right choice for your home and budget.

Are used solar panels better than brand-new solar panels?

Used panels are typically more affordable than brand-new ones, making solar energy a more accessible option for homeowners on a budget. The upfront cost of a solar panel system can be a substantial investment, and opting for used panels can significantly reduce this financial burden.

Should refurbished solar panels be recycled?

Several factors should be taken into consideration when assessing the procurement cost of refurbished solar equipment. As a general rule, Interco Trading Company suggests recycling the panel whenever the cost of refurbishing (including transportation costs, material and labor) exceeds the panel's market value.

Are used solar panels a good option for off-grid systems?

Used panels are good options for off-grid systems, but they can pose a challenge if you're trying to connect to the grid. Your utility will require a certified electrician to sign-off on your solar system and ensure that it is up to code before allowing you to tie into the grid.

Refurbished solar panels are used solar panels that have been restored to an acceptable condition or standard by a refurbishing company or the manufacturer. Below, we've highlighted the main differences between used and refurbished ...
