

Summary Overview Location Construction costs and timeline Recent developments See also External links In April 2018, CEC commenced commercial use of its 1 MW solar power station in Kitwe, as an income-diversification enterprise. In December 2021, CEC contracted Sinohydro to expand the solar farm to 34 MW, with anticipated annual output of 56.5 GWh. The power station, whose original design consisted of 3,864 photovoltaic panels, each rated at 270 watts, was the first grid-connected solar plant in Zambia. The expansion includes construction of new 11kV evacuation t...
