

CGN wind power has generated electricity

How many kilowatts will CGN power in China?

"With this wind power base,the installed capacity of CGN's new energy power generation facilities in operation in China is expected to reach 45 million kilowattsby the end of this year," said Zhang Zhiwu,chairman of the board of CGN New Energy Holdings.

What's going on with China's giant wind power project?

China Media Group A giant onshore wind power project with a generation capacity of one million kilowatts was put into operationafter being connected to the national power grid for electric power supply in the Xing'an League of north China's Inner Mongolia Autonomous Region on Wednesday.

How many kWh can a wind power project generate per year?

The wind power project is capable of generating over three billion kWhon-grid electricity per year. /China Media Group The wind power project is capable of generating over three billion kWh on-grid electricity per year. /China Media Group

What does CGN stand for?

Built by the China General Nuclear Power Group(CGNG),the first 1 million-kilowatt project,which is a mountainous wind farm,is capable of generating more than three billion kWh on-grid electricity annually. It can save more than 920,000 tonnes of standard coal and reduce nearly 2.5 million tonnes of carbon dioxide emissions every year.

Where is China's largest onshore wind power project located?

You need to sign in to comment. China's largest onshore wind power project commenced operation at full capacity on Sunday in northern Inner Mongolia Autonomous Region,according to the country's leading nuclear power operator China General Nuclear Power Corporation.

Where is China's largest wind power base?

China's largest onshore wind power base starts full-capacity production in North China's Inner Mongoliaautonomous region on Sunday. [Photo/CGN]China's largest onshore wind power base starts full-capacity production in North China's Inner Mongolia autonomous region on Sunday,said its operator China General Nuclear Power Corporation.

"This project is China's first onshore wind power project with a voltage level of 500 kV connected to the power grid system. It is also the first new energy project that transmits electric power generated through an ultra-high ...
