

Can I install solar panels at home to generate electricity

Can I install solar panels myself?

It is possible to install most of a solar panel system yourself -- mounting the panels on your roof and connecting them to each other. But if your home is connected to a grid, you'll need to hire a licensed electrician for the final connection needed to feed electricity to your utility.

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.

Is a DIY solar installation worth it?

Given a DIY solar installation will only save you 10%, the equipment alone can make hiring a solar installer worth it. Most homes with solar panel systems aren't "off-grid," even if they only use the electricity produced by their panels.

Do you need an electrician to install a solar panel?

Some solar companies design solar panel kits targeted toward DIYers. However, these kits are often meant for small builds, such as converting a shed, RV, or boat. Installing a solar energy system requires knowledge of electrician work. You'll have to work on your roof and with buried wires.

Can you install solar panels off-grid?

Many zoning laws also prohibit installing off-grid solar energy systems. DIY solar panels work best for small projects or to supplement a traditional energy source. If you want to power your home with solar, we recommend hiring one of the top solar companies to design and install your system.

How does a solar panel system work with my home?

Exactly how the solar panel system works with your home and the electric grid will depend on the type of solar panel system you have. There are three main types of home solar systems: grid-tied, hybrid (or solar-plus-storage), and off-grid. The following videos outline how different solar system types work:

Solar panels can be installed facing other directions, but they won't generate as much electricity, so you'd have to install more, which would jack up the price. You also want to install solar panels on a roof that is in good condition.

The cost of solar panels and the respective solar energy system you opt for is dependent on the amount of power you need for your home or business. In all cases, our solar installer will need to visit your home or business to determine ...
