

# Can ordinary box beds be used for storage Does it contain formaldehyde

Does furniture contain formaldehyde?

Technically, all furniture contains small amounts of formaldehyde since it's a naturally occurring substance that is found in everything from trees to humans. However, the real problem with formaldehyde in furniture is due to the fact that there is SO much added formaldehyde from the glues, adhesives, and finishes.

Is IKEA furniture formaldehyde-free?

No furniture is 100% formaldehyde-free since formaldehyde occurs naturally in small amounts. The real question we want to ask is whether or not IKEA uses any additional formaldehyde (and if so, how much?) in their products. This would mostly be in the form of glues and adhesives, specifically in furniture made from wood.

What products contain formaldehyde?

Exposure occurs by breathing air that contains formaldehyde. Sources of formaldehyde include some: Furniture products made with formaldehyde-containing adhesives, paints, lacquers, and other coatings. Composite wood products made with formaldehyde-containing adhesives such as particleboard, plywood, and fiberboard.

How can I reduce the risk of formaldehyde in my home?

There are ways to reduce the risk of exposure to formaldehyde, such as avoiding newly manufactured furniture made from particle board and looking for products with zero-VOC finishes. To avoid bringing any toxic chemicals into your home, look for organic and non-toxic products that are free of synthetic chemicals.

Does laminate furniture have formaldehyde?

Laminate essentially consists of synthetic materials that are made to look like wood. It can be quite difficult to find out exactly what is actually in laminate furniture, but it often contains things like formaldehyde (and other VOCs) as well as phthalates. Does All Furniture Have Formaldehyde?

Can new furniture increase formaldehyde levels?

While new furniture can increase indoor formaldehyde levels temporarily, most materials off-gas significantly before reaching your home. Good ventilation and air purification can help manage any residual formaldehyde. Should You Be Concerned?
