

# Capacity scale of lithium battery for energy storage

Using the detailed NREL cost models for LIB, we develop current costs for a 60-MW BESS with storage durations of 2, 4, 6, 8, and 10 hours, shown in terms of energy capacity (\$/kWh) and power capacity (\$/kW) in Figure 1 and Figure 2 ...

This inverse behavior is observed for all energy storage technologies and highlights the importance of distinguishing the two types of battery capacity when discussing the cost of energy storage. Figure 1. 2019 U.S. utility-scale LIB ...

Using the detailed NREL cost models for LIB, we develop base year costs for a 60-MW BESS with storage durations of 2, 4, 6, 8, and 10 hours, shown in terms of energy capacity (\$/kWh) and power capacity (\$/kW) in Figures 1 and 2, ...
