

What is the production capacity of photovoltaic brackets?

The company's standard industrial plant area is 30,000 square meters, and the annual production capacity of photovoltaic brackets is 6G watts. The cumulative shipment is more than 15G watts. The products are distributed in more than 30 countries and regions around the world.

Is China a major market for solar photovoltaics?

Provided by the Springer Nature SharedIt content-sharing initiative In recent years, China has become not just a large producer but a major market for solar photovoltaics (PV), increasing interest in solar electricity prices in China.

Is small rooftop photovoltaic a good investment in China?

The results show that: For small rooftop photovoltaic in China, first of all, under the existing subsidy price and cost, its investment payback period is short and the risk is low. Secondly, the average internal rate of return is more than 10%, and the levelized cost of electricity is 0.2727-0.5573 CNY/kWh, so the economic performance is good.

What is the trend and decline path of China's distributed PV costs?

We focused on the trend and decline path of China's distributed PV costs. The LCOE of distributed PV in China is expected to achieve full parity in 2025. Except 100% grid-connected mode, the IRR of distributed PV power plants in three areas is higher than 8% which has shown good economic benefits.

What is the IRR of solar power in Beijing and Hohhot?

Due to the relatively low price of PV grid benchmarking in the first and second solar energy resource areas, the IRR is less than 8% for the 100% grid-connected distributed PV system in Beijing and Hohhot, and the investment income of power plants is poor. In addition, the IRR of all other distributed power stations is greater than 8%.

How does PV module conversion efficiency affect Bos cost?

From 2019 to 2017, PV module prices dropped by about 83%. On the other hand, the improvement of module conversion efficiency means that the number of modules needed for the same generation scale is reduced, which indirectly reduces the BOS cost and operation and maintenance cost of distributed PV.

After years of study and after having gained specialized experience in the field with over 5,000 customers for whom we have produced more than 100,000 brackets, our technicians have created the "perfect bracket" for fixing ...
