

Chint PV inverter fault code OVERTEMP

Is Chint grid PV-inverter reliable?

CHINT Grid PV-Inverter is a highly reliable product due to its innovative design and perfect quality control. Such an inverter is used in high demand, grid-linked PV systems. If you encounter any problems during installation or operation of this unit, first check this manual before contacting your local dealer or representative. 1.

How do I know if my inverter is bad?

Read/record the fault code(s) displayed on the APP interface. Turn OFF the inverter via the APP or Remote access. Turn OFF the AC feed breaker. Turn OFF the AC Switch. If the MPPT current is $< 125\text{A}$ or the irradiation is obviously low, turn OFF the DC switch.

What is a CPS grid-tied PV inverter?

CHINT POWER SYSTEMS AMERICA CO., LTD. Thank you for choosing a CPS Grid-tied PV Inverter (hereinafter referred to as "PV Inverter") developed by CHINT POWER SYSTEMS AMERICA CO., LTD (hereinafter referred to as "CPS"). This PV Inverter is a high performance and highly reliable product specially designed for the North American Solar market.

How do I fix a CPLD faulty inverter?

Recommended solutions: 1. Page 99 FAULT CODES Recommended solutions: 1. Restart inverter by recycling both AC and DC Fault0060 switches. Wait for 1 minute between OFF and (CPLD Fault) ON for all energy to discharge. 2. If inverter cannot clear fault, replace Control Board or inverter. Recommended solutions: 1.

How do I troubleshoot an inverter?

Turn OFF the inverter via the APP or Remote access. Turn OFF the AC feed breaker. Turn OFF the AC Switch. If the MPPT current is $< 125\text{A}$ or the irradiation is obviously low, turn OFF the DC switch. If it is safe to open the wire-box, proceed with troubleshooting procedures listed in Table 6-2.

How many fault records can a CPS inverter store?

The last record can store up to 128 fault records in "Fault Record" menu. If the inverter firmware version needs to be updated, please contact the CPS Service Hotline at: +1 855-584-7168 Ext. 1. There are 2 submenus in the History menu: "Alarm" and "Running Status". setting or manual (fault) shut-down.

Page 98 Table 6-6 Troubleshooting Fault Codes FAULT CODES Recommended solutions: 1. Restart inverter by recycle both AC and DC Fault0130 switches. Wait for 1 minute between OFF and (Bus over total voltage) ON for all energy to ...
