What are the tolerances for a CPS inverter?

nominal power ±3% for real-time measurements with output power above 20% nominal power
±4% for all statistical data CPS inverter tolerances are specified below: Voltage tolerances: ±1%
Current tolerances: ±2% Frequency tolerances: ±0.5% Power tolerances: ±3% ...

What if PV modules input voltage exceeds the inverter's allowable range?

PV modules input voltage exceeds the inverter's allowable range. Check the number of PV modules and adjust it if need. PV modules input voltage is under the inverter's defaulted protection value. When sunlight intensity weakens, PV modules voltage decreases. No action is needed. 2.

What is the warranty policy for Chint power systems America?
