

Chint photovoltaic panel dedicated tile hook

Which roof hooks are suitable for a tiled roof?

SolarRoof has high-quality stainless steel roof hooks which are suitable for most types of tiled roofs. Side-mounted or landscape tile interfaces can be used to cater for special mounting needs. Roof hook extenders are also part of the range for installations on high corrugation tiles such as Spanish tiles

What materials are used in the manufacture of solar tile roof hooks?

The materials used in the manufacture of solar tile roof hooks are selected based on their durability and resistance to environmental factors. Stainless steel and aluminum are the most common choices, prized for their strength and anti-corrosive properties.

What makes solarroof a good roof hook?

Corrosion resistance is achieved through anodised structural grade aluminium and stainless steel components. The unique and innovative Z-module technology enables a surprisingly quick and easy installation. SolarRoof has high-quality stainless steel roof hooks which are suitable for most types of tiled roofs.

Can you use magnelis hook on a tile roof?

The hook is easily adjustable in height and fits most common roof tile/flat combinations. This Magnelis coating has a self-healing effect. This protects the hook from corrosion. You can choose with or without screwing, both are possible on tiled roofs. The choice is purely based on preference.

With a full range of roof hooks and brackets, PV-ezRack SolarRoof(TM) is suitable for most roofing types, including pitched tile roofs, metal roofs, concrete roofs and even slate roofs. High Quality Strict quality control in accordance with ISO ...
