

Chongguang Lighting Solar Light 200w does not generate electricity

How do you charge a solar panel if the lights are off?

To charge a solar panel when the lights are off, first ensure you locate the switch and verify its position. If the lights were off, turning them on should initiate the charging process during daylight and restore functionality by nightfall, given that other components such as the battery and solar panel are in working order.

Why is my solar garden light not working?

Most of the outdoor solar garden lights come with ON/OFF button, and that button needs to be turned ON. In many cases this simple thing is ignored by many people and this is one of the main reasons why your solar light isn't working as expected. There might also be a factory defect and the light doesn't turn ON. 2.

Can solar lights get water seepage?

Solar lights, especially if you place them outdoors and exposed to the weather, can sometimes experience water seepage. Too much water inside those lights could cause the light bulbs, the battery, or even the wiring inside to short circuit, making the entire thing useless.

Can solar lights be charged through glass?

Avoid Charging Your Solar Lights Through Glass Charging your solar lights through a window or behind glass can lessen their ability to charge efficiently. This happens because glass filters out certain wavelengths of sunlight that are crucial for charging the solar panels effectively.

Why do some solar lights have a disillusioning light show?

Some solar lights have a far-off solar board that is isolated from the light and connected with a link or two. If the links between the solar board and the batteries are not immovably connected, then, at that point, the board won't have the option to charge the batteries bringing about a disillusioning light show.

Can a solar light get submerged in water?

If water has completely seeped into the inner electrical wiring of your light multiple times, it might not be repairable. It's inevitable for your solar light to become exposed to rain, but do not allow any part of your solar light to get completely submerged in water.
