

# Classification of JA Solar Panels

What is the difference between JA Solar and standard solar panels?

JA Solar's standard solar modules also come in a 60-cell or 72-cell count. Here is a table to outline the differences in power output and efficiency for these modules: Outside of power output and efficiency, there are a few other features that differentiate these solar modules. JA Solar's standard panels have limited power degradation.

What types of solar panels does JA Solar offer?

The final category of solar panel modules that JA Solar has to offer are the Bifacial Mono PERC Double Glass modules. There are also 4 options within this category -- two 60-cell options and two 72-cell options. Front and Back of JA Solar's Bifacial Modules

Is JA Solar a good solar panel company?

In terms of solar panel options, JA Solar has a number of variations for the customer to choose from. With the ability to get different power outputs, solar cell counts, and solar cells types, JA Solar offers a great level of flexibility that earns them a spot as a top solar panel on our reviews.

Is JA Solar a Tier 1 manufacturer?

JA Solar is classified as a Tier 1 manufacturer by BloombergNEF. This means it employs state-of-the-art robotic techniques to oversee the production process, minimising or completely eradicating errors associated with human intervention. Tier 1 panels are also crafted from the highest quality silicon, boosting the solar panel's performance.

What is JA Solar?

JA Solar is one of the most competitively priced of the 'big-name' solar panels on the market. Most of JA Solar's products have been approved by the Clean Energy Council (listed under the parent company Shanghai JA Solar Technology Co Ltd) for the Small-scale Renewable Energy Scheme - Australia's home solar rebate program.

How efficient are JA Solar panels?

From the above tables, you can see that the power output and efficiency of JA Solar's modules are very comparable with the majority of other solar panels on the market. It is very common to see panels around 15-16% efficiency on the low end and 18-19% on the high end, although some solar panels can reach an efficiency of over 21%.
