

Thanks to community solar, anyone with an electricity bill from a major utility across our service territory can save money while supporting locally generated renewable energy through our state-supported community solar program. ...

Much higher performance than I expected. I am in a wooded area and was amazed that I generate 3x my power consumption even when the sun is behind the trees. Although the picture with the panels is a bit washed out, I purposely included a ...

What if there was a way to support local clean energy and save on your electric bill without installing a single solar panel? Community solar offers just that. Whether you're a renter, don't have a solar-compatible roof, or you ...

There are more than 8 billion square meters in the United States of rooftops where solar panels could be installed. This represents more than 1 terawatt of potential solar capacity. With recent improvements in solar panel design, ...
