

# Container Energy Storage System Combiner Cabinet

What is a containerized energy storage system?

The Container Series are outdoor containerized energy storage systems for utility grid tie or C/I behind the meter applications. They are available in 10ft, 20ft, and 40ft configurations. Power and capacity range from 150kW/150kWh up to 1.5MW/ 2.2MWh. You can combine multiple units for even more capacity.

What is Vericom energy storage cabinet?

Vericom energy storage cabinet adopts All-in-one design,integrated container,refrigeration system,battery module,PCS,fire protection,environmental monitoring,etc.,modular design,with the characteristics of safety,efficiency,convenience,intelligence,etc.,make full use of the cabin Inner space.

What is the power and capacity of the container series?

Power and capacity range from 30kW/50kWh to 90kW/150kWh. These solutions are modular and expandable to meet larger energy storage requirements. The Container Series are outdoor containerized energy storage systems for utility grid tie or C/I behind the meter applications.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a cabinet series?

The Cabinet Series for indoor and outdoor C/I energy storage systems help reduce peak energy costs from equipment and operations. Power and capacity range from 30kW/50kWh to 90kW/150kWh. These solutions are modular and expandable to meet larger energy storage requirements.

Can a liquid cooled and air cooled cabinet be paired together?

Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box. Outdoor cabinets are manufactured to be a install ready and cost effective part of the total on-grid,hybrid,off-grid commercial/industrial or utility scale battery energy storage system. BESS string setup examples are:
