

Cross-border e-commerce photovoltaic panel tariffs

What are the trade policies regarding solar panel imports?

The archive below summarizes the development of trade policies concerning solar panel imports: Antidumping and Countervailing Duties(AD/CVD) Order imposed additional duties on Chinese solar cells. Additional duties were placed on solar modules assembled in China and solar cells from Taiwan.

What are solar panel import tariffs?

Solar panel import tariffs are primarily intended to support the development of a new U.S.-based solar module manufacturing supply chain, which is financially backed by the Inflation Reduction Act. This act introduces a series of tax credits designed to bolster domestic manufacturers. For solar modules, the credits are as follows:

Should the US impose new tariffs on solar panels?

Not all U.S. solar manufacturers want Commerce to impose new tariffs on solar imports. Companies setting up panel factories, for instance, rely on low-cost solar cells from Southeast Asia to assemble into panels in the U.S. Many U.S. panel plants are owned by large China-based manufacturers.

How much will a tariff on solar cells increase in 2024b?

The tariff on solar cells has risen from 25% to 50%,and battery cells have seen increases up to 25%. Today,importing solar cells from China,which cost between a few cents to a nickel per watt,would see a tariff increase from \$0.0125/Wdc to \$0.025/Wdc with this hike. 2024b - Pending Investigation

Will USTR impose tariffs on imported solar cells & modules?

On January 23, 2018, USTR announced that the President had approved recommendations to provide relief to U.S. manufacturers and impose safeguard tariffs on imported solar cells and modules, based on the investigations, findings, and recommendations of the independent, bipartisan U.S. International Trade Commission (ITC).
