

Current status of solar energy storage industry

How much energy storage does the United States have in 2023?

EIA reports that the United States installed approximately 7.2 GW_{ac} of energy storage onto the electric grid in 2023--up 57% y/y as a result of high levels of deployment in all sectors. - EIA reported a 23% increase in utility-scale, 29% increase for C&I, and 30% increase for residential storage installations in 2023, y/y.

How much solar energy is installed in 2023?

The Solar Energy Industries Association, which has different definitions of "placed-in-service," reported 40.3 GW_{dc} of PV installed in 2023, 186.5 GW_{dc} cumulative. The United States installed approximately 26 GW-hours (GWh)/8.8 GW_{ac} of energy storage onto the electric grid in 2023, up 34% y/y.

What is the future of energy storage?

Renewable penetration and state policies supporting energy storage growth Grid-scale storage continues to dominate the US market, with ERCOT and CAISO making up nearly half of all grid-scale installations over the next five years.

What is the quarterly solar industry update?

The Quarterly Solar Industry Update provides detailed, publicly available, solar-specific information on a regular basis, giving stakeholders at every level from small solar operators to state and federal entities a means to better understand the current state of the industry and trends within it.

Will energy storage grow in 2024?

Allison Weis, Global Head of Energy Storage at Wood Mackenzie Another record-breaking year is expected for energy storage in the United States (US), with Wood Mackenzie forecasting 45% growth in 2024 after 100% growth from 2022 to 2023.

Will the solar industry continue to grow?

A significant portion of the increase came from China, which deployed around 250 GW_{dc} of solar. Overall, analysts expect the industry to continue to grow, however the range of near-term growth projections is substantial. Notes: E = estimate; P = projection.

1 · Companies across the United States are investing in record-levels of solar and energy storage to power their operations, according to the just-released Solar Energy Industries Association's (SEIA's) Solar Means Business 2024 ...
