

Customized plastic spraying equipment for energy storage cabinets

Which energy storage solutions does Delta offer?

Delta's energy storage solutions include the All-in-One series, which integrates batteries, transformers, control systems, and switchgear into cabinet or container solutions for grid and C&I applications. The streamlined design reduces on-site construction time and complexity, while offering flexibility for future expansion.

What are electrostatic atomizer spray systems used for?

Electrostatic atomizer spray systems are often used in the automotive, aerospace, and manufacturing industries to apply paints, coatings, and other finish materials. They can be used to coat a wide range of surfaces, including metal, plastic, and composite materials.

What equipment does water based electrostatic spray coating need?

Specialized equipment: Water-based electrostatic spray coating requires specialized equipment, including a high-voltage electrostatic generator, a water-based electrostatic spray gun, and a control panel that regulates the voltage and flow rate of the coating material.

Why should you choose OTSON electrostatic spray systems?

OTSON's electrostatic spray systems are well-positioned to take advantage of this trend, offering cost-saving and quality-enhancing benefits for customers. Compared to traditional coating methods, our systems can help customers to cut paint costs by up to 50% and improve production output.

Why should you use electrostatic spray equipment in your paint shop?

Electrostatic spraying is a highly efficient and cost-effective coating method that has become increasingly popular across a range of industries. Here are some key features and benefits of using electrostatic spray equipment in your paint shop:

What is OTSON DISK electrostatic spray system & manual liquid spray gun?

The OTSON DISK Electrostatic Spray System and Manual Liquid Electrostatic Spray Gun can significantly improve the quality of the spraying process and production output, while also reducing paint consumption, waste discharge, and maintenance costs.
