

# DC lightning protection combiner box photovoltaic power generation

#### What is a DC combiner box?

Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I,V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems.

## What is a combiner box in a photovoltaic system?

In a photovoltaic system, a combiner box acts as a central hubthat consolidates and manages the direct current (DC) output of multiple solar panels. Its main purpose is to simplify the wiring structure, enhance system security and simplify maintenance procedures.

### Should solar combiner boxes have surge protection?

Photovoltaic (PV) Solar Combiner Boxes should have surge protection featuresto avoid impacts from thunderstorms on entire solar energy systems. In on-grid systems, solar combiner boxes should have reverse flow protection features preventing current flowing back into grid causing harm.

### What are the advantages of a DC combination box?

Main Advantages Enhanced Safety: DC Combiner boxes are equipped with overcurrent protection, surge protection, and other protective functions, ensuring that PV systems are protected against overcurrent, lightning strikes, or voltage fluctuations.

#### What is a sunclix combiner box?

With surge protection (type 1/2) and SUNCLIX DC connectors for the input and output side (SUNCLIX mating connectors supplied as standard). String combiner box for photovoltaic systems up to 1000 V DC for connecting 4x 2 strings. Same number of input and output strings. With surge protection (type 1/2) and cable glands for the input and output side.

#### Where should a lightning protector be located in a combiner box?

Positioned at the combiner box's output end, a lightning protector is essential for both poles. It should meet specific criteria, including a maximum continuous operating voltage and discharge current. Additionally, it should have a disconnector and indicate faults.

2 stiring solar pv combiner box, 2 in 2 out, max voltage 1000V, max current output 30A, degree of protection IP65. Build-in TUV listed DC switchgears, over-voltage, over-load, lightning protection; real-time detection, long-distance communication.
