How do I get my solar system fixed?

When it comes to getting your system fixed, for most people, this will mean a simple call to their solar installer. However, things can be a little more challenging for those whose solar company is either out of business or is not responding to their calls.

Can solar panels be repaired?

Yes, solar panels can be repaired depending on the type of damage, but it's typically better to replace the damaged panels. Our Service Department can inspect your system to see whether the fix can happen on-site.

What are the best practices for servicing and repairs of solar panels?

To ensure the efficient operation of solar panels, here are some best practices for servicing and repairs: Regular cleaning: Periodic cleaning of solar panels, particularly in dusty or polluted environments, helps maintain optimal performance. Use soft brushes or sponges and gentle cleaning solutions to avoid scratching the panel surface.

How much does solar panel cleaning cost?

Solar panel cleaning should cost around \$15 per panel or \$300 for a 20-panel system. The energy payback on this spend should be well and truly worth it as output can decay 10-20% if your panels are dirty. How often should I get my solar panel installation serviced?

How do you clean a solar panel?

It's best to use either a hose or low-pressure sprayer with soapy water to thoroughly remove any buildup of dirt, debris or snow when cleaning solar panels. If cleaning in freezing temperatures, make sure the water you use is warm so it doesn't freeze on the panels.

A solar panel inverter converts the direct current (DC) electricity produced by your solar panels into alternating current (AC) for your home to use. Most inverters will do this with a 93-96% efficiency, but certain newer types can have an ...
