

# Difference between single-row and double-row photovoltaic panels

This article will get you started on the right foot with a simple and fast process to get you out in the field faster with excellent results. The first step in calculating the inter-row spacing for your modules is to calculate the height difference from ...

On the other hand, 2P trackers (vertical two-panel configuration) of an increased height and two 45-module rows, are shorter in height, adapt well to terrain characteristics and need less foundations. Despite these initial advantages, ...
