

Digital generator wind shield

What is a champion storm shield generator cover?

Customers say the Champion Storm Shield Generator Cover is easy to assemble and provides excellent protection for generators during inclement weather. Many appreciate its sturdy construction and thoughtful design, which allows for easy access to controls and refueling.

What is a digital hybrid generator?

Champion's innovative Digital Hybrid is 50% quieter and 20% lighter than a traditional 3500-watt generator. Our advanced feature-packed power solution includes Quiet Technology, Extended Run Time, Economy Mode and Clean Power, plus you can easily increase your power with the optional Parallel Kit.

Does a Wen cover work with a generator?

Even though it's specifically designed for WEN products, this cover should still work well with most inverter generators between 3,000 and 4,500 watts, and uses a helpful drawstring and elastic base to ensure a nice tight fit. Key Specs

What is the difference between a 3500-watt generator and a digital hybrid?

This item is excluded from all discounts and promotions. Champion's innovative Digital Hybrid is 50% quieter and 20% lighter than a traditional 3500-watt generator.
