

District explosion-proof photovoltaic panel charging

What are explosion proof solar panels?

Photo voltaic, or solar power modules are used to generate power from the sun. Orga's explosion proof solar panels forms a part of a complete system that also comprises a battery unit, battery charger or rectifier unit and a distribution system.

Can solar panels be used in a gas explosion hazard area?

They can also be used in zones 1 and 2 gas explosion hazard areas. At Orga we have an enviable track record in the design, engineering and supply of stand alone solar systems and there is so much more to them than just solar panels and batteries.

Who is explosion proof solar systems & LED lighting?

Explosion Proof Solar Systems & LED Lighting - RESSCOTT LTD. In 2021, RESSCOTT LTD and JCE Energy formed a Strategic Alliance Partnership (SAP) to introduce Explosion Proof Solar Energy Components & engineering designs, and Explosion Proof LED lighting for the upstream and downstream oil and gas sectors.

What are ATEX/IECEEx certified solar modules?

The ATEX/IECEEx certified solar modules protect your employees and your investment, and prove a highly efficient and solid source of energy for your production process. For applications in hazardous areas, (i.e. LNG, Oil & Gas installations), we offer explosion proof solar modules. Fully certified according to latest ATEX and IECEEx guidelines.

Are solar modules hazardous area certified by TÜV?

Hazardous area certification by TÜV according to NEN-EN-IEC 60079-0, 60079-7 and 60079-18 for Zone 1. Solar modules are produced according to IEC 61215/2 and IEC 61730. This datasheet is not legally binding. Actual specifications and /or product features may vary.
