

Energy Storage Photovoltaic Bidding Document Template

What should be included in a PV system monitoring proposal?

Monitoring shall include revenue-grade metering of PV system production and building consumption, pyranometer, and ambient air temperature sensor. Proposals must include Internet hosting of monitoring with on-line access for Buyer personnel and touchscreen kiosk or video monitor for public display of data.

What documents do you need to build a PV system?

Upon completion of construction, the Contractor shall submit final design documents, including, at a minimum, drawings that are updated to reflect all changes, with details of PV system structural support, any roof penetrations, electrical single-line diagrams, and complete product literature for review by the Government.

Where can I get a photovoltaic license?

Photovoltaics at DOE's National Renewable Energy Laboratory License: License document issued for the National Renewable Energy Laboratory Science and Technology Facility (STF) roof-top PV power purchase agreement. U.S. Army Fort Carson Photovoltaics Project Lease: Project lease issued for the Fort Carson PV PPA.

Why should you use a solar procurement template?

Save time in compiling the specifications section of a solar procurement. The template language can be used as a starting point from which agency managers can customize their own language. Act as a checklist so that agencies managers address key issues throughout the process, to ensure the project's best possible outcome.

How do I send a solar RFP response email?

The subject line of the email should be: "HOME Solar RFP Response." It is required that attachments with file sizes exceeding 8MB be compressed (i.e., zipped) and/or divided into multiple PDFs and e-mails with individual files labeled Volume I, Volume II, etc. to ensure message delivery.

What types of electrical plans are included in a PV system?

Electrical Plans, including single-line electrical diagrams showing utility interconnection and all devices comprising the PV system, including, but not limited to: PV arrays, combiner boxes, circuit breakers, disconnect switches, inverters, meters, timers, control devices, and other equipment comprising the complete system.
