How do I set export control power to 0W?

Set Export control power to 0W Single-phase inverter connected to single-phase grid Single-phase inverter connected to three-phase grid (net metering area) Menu main-- settings-- Advanced settings--Export Control Set Export control power to 0W Note: Export Control value can be set from 0W to more than the rated output power.

How a zero export inverter works?

Zero Export device will monitor & then accordingly Inverter can generate the same unit or less unit than the load. o In India where net metering is required, sometimes local DISCOM provide the facility in 6-8 months. Due to uni-directional meter available on site, it pays a lot of cost to the client because of extra un-used units generated on site.

How to enable zero export in single phase inverter?

Zero Export Device in-built into Single Phase Inverter can take maximum 150Amp current only. In Single Phase system, we can go for zero export for connected load upto 5KW & cable from LT Panel to net meter dia should be less than 16mm. We have to connect CT with Inverter through Ethernet cable to enable zero export of the system.
