

Could foreign companies be involved in Indonesia's solar power growth?

The project was a joint venture between Indonesia's state utility company and Masdar, a United Arab Emirates-based renewable energy company. It highlights the potential for foreign companies to be involved in Indonesia's solar power growth and signals a favourable regulatory and economic climate for investors.

How can IESR support accelerated solar deployment in Indonesia?

To support accelerated solar deployment in Indonesia, in March 2020, the Institute for Essential Services Reform (IESR) signed an MoU with the Global Environmental Institute (GEI) to collaborate on renewable energy development.

Should Indonesian assemblers buy solar panels more cheaply?

Even if Indonesian assemblers were able to buy the solar cells more cheaply, they would still face numerous other competitiveness challenges because Indonesian manufacturers tend to use less sophisticated semi-automatic assembly equipment, which sometimes results in lower quality panels.

3 &#0183; In response to U.S. tariffs placed on solar modules imported from Southeast Asia, Thornova Solar has shifted solar panel and cell manufacturing to Indonesia. Thornova Solar customers in the U.S. market will be served by two ...
