

# Fire protection requirements for energy storage systems

What are the fire and building codes for energy storage systems?

However, many designers and installers, especially those new to energy storage systems, are unfamiliar with the fire and building codes pertaining to battery installations. Another code-making body is the National Fire Protection Association (NFPA). Some states adopt the NFPA 1 Fire Code rather than the IFC.

What NFPA regulations apply to storage batteries?

1206.2.11.1 Fire-extinguishing systems. Rooms containing stationary storage battery systems shall be equipped with an automatic sprinkler system installed in accordance with Section 903.3.1.1. Commodity classifications for specific technologies of storage batteries shall be in accordance with Chapter 5 of NFPA 13.

What is storage fire detection?

SEAC's Storage Fire Detection working group strives to clarify the fire detection requirements in the International Codes (I-Codes). The 2021 IRC calls for the installation of heat detectors that are interconnected to smoke alarms. The problem is detectors and alarms are different systems that cannot be interconnected with one another.

What if the energy storage system and component standards are not identified?

Table 3.1. Energy Storage System and Component Standards 2. If relevant testing standards are not identified, it is possible they are under development by an SDO or by a third-party testing entity that plans to use them to conduct tests until a formal standard has been developed and approved by an SDO.

What is battery energy storage fire prevention & mitigation?

In 2019, EPRI began the Battery Energy Storage Fire Prevention and Mitigation - Phase I research project, convened a group of experts, and conducted a series of energy storage site surveys and industry workshops to identify critical research and development (R&D) needs regarding battery safety.

Does a fire protection system require fire protection?

The system will require fire protection in the form of smoke detection, fire detection, and/or fire-suppression systems.
