

Hanergy thin film solar panel 140w

Why is Hanergy a world leader in thin-film solar technology?

It has also been the chief developer or involved in the development of more than 10 national and industry standards on solar energy. Through global technical integration and independent innovation, Hanergy has become a world leader in thin-film solar technology.

Who is Hanergy solar?

Hanergy is one of the largest solar manufacturers in the world, specialised in thin film. It has attached great importance to investing in thin-film solar cell research. Six R&D centers have been established by Hanergy in Beijing, Sichuan, Silicone Valley of the US, and Uppsala, Sweden.

What is HanTile solar roof?

Based on Hanergy's MiaSol[®] high efficiency Thin Film cells, the Hantile is the ultimate roof application of thin film. Finally all visible surface of a curved solar roof tile can be efficiently used, making it possible to get maximum yield of a tile roof. Under all circumstances.

What does Hanergy do?

Hanergy provides a wide range of more cost-effective and convenient solar power application products with maximum mobility and flexibility for all daily life purposes. This form collects your name, email and content so that we can keep track of the comment placed on the website.

Where is Hanergy based?

Six R&D centers have been established by Hanergy in Beijing, Sichuan, Silicone Valley of the US, and Uppsala, Sweden. So far, Hanergy has applied for almost 1000 patents in new energy, out of which 60% are invention patents (including core patents from the acquired overseas companies).

What services does Hanergy offer?

For medium and large solar projects Hanergy with its partners provides all services needed, from finance/business modelling to final installation and maintenance. Building Integrated PV can bring you attractive green buildings by integrating solar power solutions in flat and slanted roof-tops, windows, facades, curtain walls and ceilings.

Superior Energy Yield of Thin Film. Up to 10% more energy than crystalline silicon in most climates. Industry leading temperature coefficient ($-0.26\%/^{\circ}\text{C}$) provides greater energy yield in most operating conditions. Proprietary cell ...
