Can solar panels cause a roof to leak?

The installation of solar panels on your roof can be an exciting time as it means you will be cutting down your energy costs considerably, but doing this will involve drilling holes in your roof, which could beg the question of whether this will cause your roof to leak? There are various reasons your roof could leak after installing solar panels.

How do I know if my solar panels are leaking?

Pooling water on the roof or around the solar panels clearly indicates a roof leak. If you observe standing water after rainfall, it's crucial to investigate further and identify the source of the leak. 4. Decreased Energy Production or System Performance A roof leak can also impact the performance of your solar panel system.

Why do solar panels leak?

Older roofs or roofs with existing damage may be more susceptible to leaks under the added weight and penetration of solar panels. Flashing issues: Flashing is used to create a watertight seal around roof penetrations such as vents, chimneys, or skylights. If the flashing is damaged or improperly installed, it can cause water to seep in.

How do I fix a roof leak after installing solar panels?

If you're experiencing roof leaks after installing solar panels, contact a professional roofing contractor who specializes in solar panel installations for a thorough inspection. They can identify the source of the leaks and recommend appropriate solutions.

How do I seal a leak under my solar panels?

Applying sealant is a temporary solution that can help to seal small gaps or cracks in the roof under your solar panels. This can be particularly useful when you have identified the source of the leak and it is accessible. Here are the steps to follow when applying sealant:

Can solar panels be installed on a roof?

Most modern roofs are compatible and able to withstand the installation of solar panels, but in some cases, the roof material is susceptible to leaks. If your roof is made from clay, terracotta, wood shingles, or slate, there is an increased risk of leaks developing through the installation.
