

Household Solar Power Generation Service Hotline

Do you qualify for a free home solar system?

Homeowners may qualify for a free home solar system from our partner, GRID Alternatives. Find out if the Disadvantaged Communities - Single-family Solar Homes (DAC-SASH) program, a state of California program for low or fixed-income families, can help you. Your home must be in a DAC to qualify. [Learn more](#)
Do You Rent and Still Want Solar?

Should you choose solar energy for your home?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. Homeowners should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.

When will SCE provide authorization to operate my solar system?

SCE will provide authorization to operate the solar system once proper installation and permitting are completed. Once your solar system is installed and you have been given the authorization to operate your solar system, you will be interconnected with our electric grid.

Can PG&E help you install and manage your solar energy system?

Let PG&E help you install and manage your solar energy system. Why? You can reduce your monthly bill and your carbon footprint. PG&E offers a range of incentives to help you adopt clean energy systems.

Do customers with private generation systems still receive electricity from DTE?

Yes. Customers with private generation systems are still connected to DTE's grid and receive electric energy from DTE when their system does not produce enough power to meet their needs. You'll still receive charges according to your rate schedule for total inflow, including any fixed charges associated with the relevant rate schedule.

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.

Charging: You can store power from either your home or business rooftop solar system, or from the grid when electricity prices are lower, to be used at a later time. If an outage is imminent due to a storm or shutoff event, some storage ...

India is on the cusp of a solar revolution and we at Tata Power Solar have been right at the forefront, leading the move towards sustainable energy solutions. Investing in rooftop solutions leads to great savings, while
