

How big should the energy storage container lighting be

How many lights do I need in a shipping container?

We recommend 1 light for each 10ft length of shipping container, The bigger lights are nicer and will put out more light, making it slightly easier to see smaller items such as nuts, bolts and screws as opposed to full boxes of gear.

Do storage units have lights?

It is important to note that most storage unit facilities do not have individual lighting inside the units. The lights are typically only in the hallways or just outside the unit so it's important to keep this in mind. How do business owners of this type of business make up for the lack of light inside the actual storage unit? Here are a few tips:

How do I choose a lighting fixture for a storage unit?

The exact lumen needs of the space will depend on the size of the hallways and how much light is trying to cast in the units. Opt for fixtures with reflectors. A reflector on a fixture ensures that the majority of the light produced is spread down and out which can be especially important in a storage unit business.

What are the best storage unit lighting options?

One of the easier options for storage unit lighting is portable construction lights. These can be useful and practical for this sort of space since they offer high powered illumination you can take anywhere. Best of all, these come in LED options which tend to be low heat and makes them ideal for use in such as confined space without worry.
