

How is TBEA s microgrid

Where is TBEA launching a solar-storage-charging microgrid project?

TBEA Launches First Industrial Park Solar-storage-charging Demonstration Project Also in April,TBEA's first solar-storage-charging microgrid demonstration project based on a two-part demand response pricing system completed its three-month trial operation. The project is located at TBEA's Xi'an industrial park.

What does TBEA do?

TBEA has built China's only complete set of electric power and energy industry chain,covering coal,polysilicon,silicon wafer,component,grid inverter,static var generator,and photovoltaic power station.

What is TB-ECloud & how does TBEA work?

As for smart energy management,TBEA,based on Big Data,Cloud Computing,AI and other advanced technologies,builds TB-eCloud platform,realizing the targeted,collectivized and full life cycle operation and maintenance management of PV power stations in an efficient,intelligent and convenient manner.

What products are made by TBEA?

Products manufactured by TBEA are used in many elements of the project, including multi-port power routers used in key equipment for the AC-DC hybrid microgrid, PV inverters and a full range of SVG products that are capable of effectively improving microgrid quality.

What makes TBEA a good energy service provider?

As an excellent green wisdom energy service provider in the world,TBEA specializes in providing excellent solutions and improving energy efficiencyfor clients in the new energy industry.

How many PV and wind projects are running on TB-ECloud?

At present,there are over 5GWof PV and wind projects running on the TB-eCloud smart energy management platform. The microgrid demonstration project offers a panoramic view of TBEA's key equipment applications in the inverter sector and other areas.
