How long do solar panels last?

Most reputable manufacturers offer production warranties for 25 years or more. The average break even point for solar panel energy savings occurs six to 10 years after installation. If the panels continue to produce at a high level for another 15 years after that, you will end up saving thousands of dollars during the solar panels' lifespan.

What are solar panel brackets?

Solar Panel Brackets: The Ultimate Guide, types and best options. Solar panel brackets are an essential component of any solar panel system. They are used to secure solar panels onto rooftops, ground mounts, or other structures.
