How much does a solar lease cost?

When someone buys solar panels outright, they can enjoy energy savings - and can usually break even after around just eight years. Although people will still save this amount with a solar lease, they'll also have to pay between \$50 and \$250 for the monthly fee.

Should you lease or buy solar panels?

By leasing solar panels, you replace your monthly utility bill with a monthly equipment lease payment and pay no cash up front. You enjoy low (or no) installation and maintenance costs. You may also benefit from solar panels in other utility costs by home heating through solar power, solar pool heating, and even solar hot water heater installation.

Can you sell a solar system under a lease?

Under a solar lease, you won't own your solar system, but will still benefit from its generated electricity. A leased solar system can make selling your home more difficult because the next owner may not want to take over your lease payments. What is a solar lease?

Does a solar lease cover a roof penetration warranty?

As well as covering the costs of the solar panel system, most solar lease suppliers also cover a roof penetration warranty. In some parts of the US, the weather is notoriously unreliable, which means solar panels can generate more energy on some days compared to others.

What is a solar lease?

You can think of a solar lease like a car lease - it's a form of third-party ownership (TPO) where you don't own the product that you're paying for. Under a solar lease, this third-party owner (e.g., a solar company) installs solar panels on your property and then sells you the electricity produced at a predetermined monthly rate.

How do Solar Lease companies make money?

All the solar lease providers listed make their money by financing a solar system for your home and then selling you the solar electricity from the panels. In most cases, the companies promise you will save money on your power bills in the first year - a win-win situation.
