

# How much does photovoltaic energy storage cost per watt-hour

How much does an energy storage system cost?

The modeled \$/kWh costs for 600-kW Li-ion energy storage systems vary from \$469/kWh (4-hour duration) to \$2,167/kWh (0.5-hour duration). The battery cost accounts for 41% of total system cost in the 4-hour system, but only 11% in the 0.5-hour system.

Are solar photovoltaic system and energy storage cost benchmarks a unique fingerprint?

Dive into the research topics of 'U.S. Solar Photovoltaic System and Energy Storage Cost Benchmarks: Q1 2021'. Together they form a unique fingerprint. Ramasamy, V., Feldman, D., Desai, J., & Margolis, R. (2021).

How much does solar installation cost?

Installation labor accounts for around 5.5% of the total cost of a residential solar project, according to a 2022 report from the National Renewable Energy Laboratory. That amounts to \$1,375 for a \$25,000 solar project.

How much does a 5000 watt solar system cost?

A fully installed solar system typically costs \$3 to \$5 per watt before incentives like the 30% tax credit are applied. Using this measurement, 5,000 Watt solar system (5 kW) would have a gross cost between \$15,000 and \$25,000. The price per watt for larger and relatively straightforward projects are often within the \$3-\$4 range.

How much does a 600 kW energy storage system cost?

Figure 19 shows the resulting costs in nameplate and usable capacity (\$/kWh) for 600-kW Li-ion energy storage systems, which vary from \$481/kWh-usable (4-hour duration) to \$2,154/kWh-usable (0.5-hour duration). The battery cabinet cost accounts for 47% of total system cost in the 4-hour system but only 19% in the 0.5-hour system.

How much does a 5 kW storage system cost?

23 This report is available at no cost from the National Renewable Energy Laboratory (NREL) at As demonstrated in Figure 13, the kit for a 5-kW/12.5-kWh storage system costs approximately \$6,406-\$6,662 with a total installed cost of \$15,852 (DC-coupled) to \$16,715 (AC-coupled).

There are two main ways to calculate the cost of a solar system: Price per watt (\$/W) is useful for comparing multiple solar offers. Cost per kilowatt-hour (cents/kWh) is useful for comparing the cost of solar versus grid energy. Let's ...
