

# How much does the country subsidize solar power generation

What percentage of federal energy subsidies are wind and solar?

Wind and solar combined represented 94 percent of the federal renewable electricity-related subsidies in FY 2022, while producing a combined 5.5 percent of primary energy. \_\_\_\_\_ Energy end-use subsidies (Low-Income Heating Assistance and other such programs) were the second highest category after renewable subsidies.

Are solar energy subsidies growing?

Since FY 2016, tax expenditures have continued to grow, increasing to over 75 percent of total federal support in recent years. On a total dollar basis and on a unit of production basis, solar energy had the highest federal electricity-related subsidies in FY 2022.

How much did renewable subsidies increase in fiscal year 2022?

Renewable subsidies jumped to \$15.6 billion in fiscal year 2022 from \$7.4 billion in fiscal year 2016, according to the Energy Information Administration's Federal Financial Interventions and Subsidies in Energy report.

What is the largest federal energy subsidy?

The largest electricity-related federal energy subsidies were for renewable energy since subsidies for wind and solar each exceeded subsidies for coal, natural gas and petroleum, and nuclear.

Do federal subsidies for renewables lower electricity costs?

Federal subsidies for renewables have not decreased electricity costs for consumers. The ITC and PTC subsidies have only lowered out-of-pocket costs for renewable project developers.

Which energy subsidies received the most money in FY 2022?

Coal, oil, natural gas and nuclear received 15 percent of all subsidies in FY 2022, despite providing vastly larger amounts of energy than renewable energy--the largest subsidy recipient. End use subsidies that provide support for lower income Americans to help pay utility bills were the second largest subsidy category after renewable energy.
