

# How much does the finished photovoltaic bracket cost

How much does a home solar installation cost?

The faster the cost of electricity increases, the shorter your payback period and the greater your savings will be. Lower solar prices also drive shorter payback periods. Ten years ago, a home solar installation cost \$3.60/W according to the National Renewable Energy Laboratory. That's 31% more than what we see on EnergySage right now.

How much do solar panels cost per square foot?

On average, solar panels cost \$8.77 per square foot of living space, after factoring in the 30% tax credit. However, the cost per square foot varies based on the size of the home. For example, the post-tax credit cost of solar panels for a 2,500-square-foot home is around \$20,000 for a rate of \$7.96 per square foot.

What is a solar buyback period?

A solar buyback period is the amount of time it takes for your electric bill savings to surpass the overall cost of the system, which is a key factor for many when determining whether or not converting to solar is worth the investment.

What is the payback period for solar panels?

The payback period for solar panels is typically 6-11 years, depending on factors like your utility rate, electricity consumption, and how you financed the system. With a solar loan, many homeowners can achieve "Day 1" savings by having a loan payment that's lower than their average electricity bill.

What is NREL's PV cost benchmarking work?

NREL analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. NREL's PV cost benchmarking work uses a bottom-up approach.

How much does a solar inverter repair cost?

Labor is typically priced at \$100 per hour. Materials for solar repairs could be as little as \$180 but may also be greater than \$1,000. Your combined total bill may range from \$200 to \$3,000. A replacement inverter is the most common repair, and this is a planned maintenance item every 10-13 years.
