

# How to calculate photovoltaic panel tiles

Estimates the time it takes for a PV system to pay for itself through energy savings.  $PP = IC / (E * P)$  PP = Payback period (years), IC = Initial cost of the system (USD), E = Energy price (USD/kWh), P = Annual power output of the ...

For example, if you have a solar panel that has a Voc (at STC) of 40V, and a Temperature Coefficient of 0.27%/&#176;C. Then for every degree celsius drop in panel cell temperature, the voltage will rise by: ...  
Calculate the minimum panels per ...
